OVERVIEW OF THE CIVIL SERVANTS FOR 2020-21

INTRODUCTION

Human resource planning and policy making is a systematic and strategic process based upon the reliable and accurate statistics. The compilation and maintenance of statistics regarding civil servants of Federal Government is one of the functions of Pakistan Public Administration Research Centre (PPARC), Establishment Division. For effective planning and career development, it is necessary to collect and analyze information about available human resource. For this purpose, PPARC periodically carries out censuses of Federal Government Civil Servants in terms of their classifications and characteristics after every three years. In addition to triennial censuses, the statistical bulletins are also published on annual basis. These bulletins are user intensive and are compiled to meet the demand of the current data, about the employees of the Federal Government, by the Parliamentarians, Ministries, Divisions, Provincial Governments, Institutional Reforms Cell, Pay & Pension Commission, Research Institutions and Non-Governmental Organizations (NGOs) and public at large.

3. This is the twenty fourth annual statistical bulletin for the year 2020-21 and depicts the employment status as on 01-07-2020. It contains wide range of statistics covering not only the sanctioned and actual working strength of employees, but also shows domicile wise position of employees working in the main Ministries/Divisions/Attached Departments/Subordinate Offices/Constitutional Bodies. The strength of employees of occupational/functional groups on the basis of domicile and basic scale were also included in this bulletin. The bulletin also reflects the strength of Non-Muslim employees and detail of number of employees working on Management Position scales (MP-scale). Information about working strength of female employees by domicile and basic scale working in Federal Government departments were also provided in this bulletin. To make it more effective and to support effective policy formation, new parameters have been introduced, such as statistics of PhD employees, Disable employees, Contract employees and number of employees retiring during the year have also been included in this bulletin.

METHODOLOGY

4. A well-defined methodology has been adopted in order to collect, compile and publish employee's statistics. Out of two basic sources of data collection i.e. primary and secondary, the primary approach has been adopted for data collection for this Bulletin. Primary data are usually

directly collected from respondents using any tool like questionnaire, recording equipment, direct personal interviews etc. However, sometimes secondary sources like books, journals, newspapers etc. are also utilized for data collection in some queries. For this Bulletin the data is directly collected from the Ministries / Divisions / Departments with reference time 01-07-2020. It is pertinent to highlight that in whole process, five questionnaires/proformas were designed and sent to all Ministries / Divisions / Departments through mail for collection of data. Charts and graphs were constructed to summarize the data and to see trends in public sector employment.

5. The ultimate goal of the methodology adopted for the bulletin is to expedite the whole process and finalization of bulletin on targeted timeframe. In order to complete the assignment in time, several telephonic contacts and personal visits were made to the relevant offices for collection of the data. After retrieval of data in PPARC, the information was checked regarding completeness and a few cases were referred back to complete the deficiencies and correct the inconsistencies in the data. After satisfaction from all aspects, the data were entered in the computers. Print outs of punched data were taken and checked with source documents in order to confirm the authenticity. The tabulations were generated and compared with available data sources in order to check the validity. The data then published for accomplishment of the following objectives.

III. Domicile Wise Overall Analysis

14. It is pertinent to mention that domicile wise strength of employees does not depict the actual position of provincial/regional quota in Federal Government employment. The reason is that the data are collected according to domicile wise strength of employees which include posts filled through promotions, by direct recruitment as well as on merit quota i.e. (7.5%). It also includes posts in BS-1 to BS-5 which are locally recruited. In addition, every Ministry / Division / Department has their own recruitment rules separately for each post and separate quota rosters are maintained for each and every post. Therefore, simple calculation of quota percentage out of total working strength does not reflect the true picture of provincial / regional quota applicable for employment in the Federal Government.

15. The provincial and regional domicile wise analysis shows that Punjab (including Islamabad), Sindh, KP, Balochistan and Gilgit Baltistan reveal an increase of 0.14%, 0.61%, 5.70%, 4.21% and 2.44% respectively during the period under discussion as compare to the previous year i.e. 2019-20. While AJ&K and FATA reveal a decrease of 1.51% and 10.37% respectively during the period under discussion. Radar chart in Figure-6 shows the domicile wise change in working strength of employees belong to different province/region.
